STRAWBERRY PLANTS

All of our pot-grown plants are strong and well rooted, being grown in two and one-half inch pots, and are shipped in the pots in which they are grown, thereby insuring safe shipment, the roots undisturbed, allowing them to be transplanted to the best advantage.

Pot-grown Strawberry Plants are usually ready for delivery after August 1st but sometimes later, according to the season.

Strawberries when planted during August will produce a fine growth during late Summer and early Fall which will insure a good crop the following Summer.

The varieties indicated by the letter "P" are the pistillate sorts, and should be planted among other perfect-flowering kinds; this may be best effected by planting every other or every second row of the latter sort, thereby allowing the pistillate varieties to become pollenized.

Layer plants are ready for delivery about May 1.

"DeLUE'S JUDITH" (New Variety)

This new early seedling was awarded the Silver Medal by the Mass. Horticultural Society in 1915 and three first prizes in open competition at the annual show of the same society in 1917. The past summer it was ripe June 6th and was the first native berry shipped into Boston and brought the highest price that a berry ever brought at wholesale in the Boston market (\$1.00 per box), while the best of the New Jersey, New York, and Maryland berries were selling at 35 and 40 cents.

The "DeLue's Judith" is a perfect blossom variety.

It is very large and carries its size well throughout the whole season, making it one of the most valuable for the home garden. The color is deep red all through and quite glossy. It is of good form and has no superior for flavor; is very smooth in texture and without core. Its firmness and fine appearance makes it a fine shipping berry for market gardeners. Price, each, 40c.; per doz., \$4.00; per 100, \$25.00.

AROBINE. A new Berry—and one with all the good qualities required to suit both the home and market-growers; medium large in size; very free in flower and fruit; excellent color and form; flavor unsurpassed.

ARLINGTON. (Midseason.) A strong growing native variety of recent introduction. The fruit is of large size, bright red in color, very solid and of excellent flavor.

BARRYMORE. This fine strawberry was awarded a Silver Medal by the Massachusetts Horticultural Society in 1908, for its excellence. The plants are of strong growth and very productive. The conical shaped berries are of medium size and of a dark, glossy, crimson color; the flesh is a rich red and very juicy.

BELMONT. (Late.) One of the standard varieties and always reliable, and without exception the berry whose flavor has not been excelled. Fruit is of medium size, firm and heavy; the color a deep, rich red, shading light at the centre. As to its keeping qualities it is without doubt the best. An excellent sort for market purposes and home use; its lateness in ripening is a decided advantage, especially when grown for preserving.

BRANDYWINE. (Midseason.) A strong growing merical growers for its quality as a shipper. Color blood red; round; yields very large crops of finest quality berries.

CHESAPEAKE. (Late.) The most productive of the late varieties. Fruit extra large and very smooth, color crimson to dark and of rich aromatic flavor.

COMMONWEALTH. (Late.) A berry of Massachusetts origin and one which has a long fruiting season; it is probably as large as any berry at the present time and fully as productive. Its color is that dark crimson so much admired and unexcelled for its fine flavor and juiciness. Plants are particularly strong in growth.

EXCELSIOR. (Extra Early.) One of the earliest berries in existence; unusually productive owing to its early fruiting season. The fruit is of round, conical form, of fair size and excellent flavor. The color a dark red and glossy, holding nearly to the center.

GANDY. (Late.) An excellent late berry of uniform size and perfect in form; color bright crimson and very glossy; best results when grown on moist soil.

GLEN MARY. (Midsummer.) An excellent berry for quality, large size and productiveness, and one that meets all requirements for home and market use. Usually the last berries picked are as large as the first. The color which is a deep glossy crimson is very attractive; the fruit is firm and solid and of excellent flavor.

GOLDEN GATE. (Midseason.) This variety is a particularly strong grower and very heavily rooted, bearing large stems and thick foliage; the flower stems are quite erect, producing large, strong blossoms, making an exceptional sort for planting with the pistillate sorts for pollenizing. Fruit is a rich crimson, rarely showing fruit with green tips.

MARSHALL. (Midseason.) Undoubtedly the best strawberry for home use and one of the best as an exhibition berry, usually taking a prize wherever exhibited. The fruit is extra large and rarely mis-shapen. The color is one greatly admired, being a rich, glossy crimson, with this deep color running nearly to the center, while the quality is unexcelled.

MINUTE MAN (P.) (Late.) Is a vigorous grower, very productive, fruit of crimson color, excellent quality and continues to bear longer than most other berries.

METEOR. Medium early of good size and flavor. Sets very freely and is a good shipper; very dependable variety.

NEW YORK. One of the best sorts for private or market gardens. The berries are large, of conical form; dark red color, firm texture and of remarkably sweet flavor. In the market they sell at sight.

SENATOR DUNLAP. (Midseason.) Is one of the universally popular varieties; famous as a shipper. Color dark red; top-shaped; fruit large, rich flavor.

SAMPLE P. (Midseason.) A variety much used for market; is a heavy yielder of large berries, excellent flavor.

WARREN. (Medium.) One of the recent introductions of our local market, which has received a great amount of attention when exhibited. It is reported by the few who have grown this berry that it is ahead of anything they had ever grown. The fruit is borne in large clusters while the individual berries are of extra large size.

Pot-grown Strawberry Plants (from 2½-in. pots)
Doz. 75c.,—100 \$5.00,—1000 \$45.00.

Strawberry plants in pots cannot be sent by mail.

FALL BEARING OR EVERBEARING STRAWBERRY PLANTS

Everbearing strawberries are now extensively grown both for home use and for market. They bear fruit steadily from early June until December. To get a large crop during the latter part of summer and in the fall, the blossoms should be picked off until about July 1st. Price, per doz., \$1.00; per 100, \$7.00; per 1000, \$65.00.

PERLESS. This variety is considered to be the best everbearing sort yet raised. The fruit is rich in color and sweet in flavor, of good size and form.

PROGRESSIVE. A very choice everbearing sort with plants similar to the Dunlap, being strong, healthy and very hardy and a good plant maker. The Progressive is one of the most perpetual, producing good picking for approximately four months when weather is favorable. Berries of medium size, dark red inside and out.

SUPERB. The fruit of this excellent variety is very large, glossy dark red color, particularly firm and choicest quality. The Superb is the largest Fall Strawberry and its glossy color makes it very attractive. The berries are of exceedingly uniform size and shape and a rich blood red from outside to centre.

HOUSE OR ROOM GARDENING

This mode of room decoration was introduced by us some years since. Continued experiments have enabled us to extend our list of successful subjects. When our materials are used the following hints on cultivation should be followed: Sprinkle fibre, which should be thoroughly moistened, over the bottom of the howl to a depth of 1½ inches, carefully place the bulbs upon the fibre, taking care that they do not touch each other, then fill up the howl with fibre. Although it is desirable that the fibre should be all around the bulbs, it must not be packed too tightly, and must cover the top of the bulbs.

Start the bulbs into growth by thoroughly saturating the fibre with water, drain off and keep moist; then place the howl in an airy room or shelf in a subdued light. When the young growth pierces the fibre, the bulbs may be placed on a table near a window or some other light place to mature their growth and come into flower.

CARTERS ENGLISH IRIS

The English Iris is a type of this lovely tribe that is not nearly so largely grown as its beauty deserves. The species consists of many varieties, differing chiefly in shades of color in the bloom, in which white to sky blue largely predominate, but others are bright blue grading down to the richest purple. They reach a height of from 1 to 2 feet, and flower in June and July. A fine border plant in deep light soil. Invaluable for cutting.
If by parcel post add postage at zone rates; weight 4 lb. per 100. Dozens mailed free.

CARTERS EXTRA CHOICE MIXED. Per doz., .50; per 100, 3.50; per 1,000, 30.00.

CARTERS SPANISH IRIS

The Spanish Iris, generally regarded as the "Orehid of the Flower Garden," is at its best during June, and exhibits lovely blossoms of varied shades. The bulbs should be planted in clumps in loose, sandy soil, about 3 in. apart, and 3 to 4 in. in the ground.
If by parcel post add postage at zone rates; weight 3 lb. per 100. Dozens mailed free.

CARTERS CHOICE MIXED. Per doz., .35; per 100, 2.25; per 1,000, 20.00.

LILIES

*Lilium Candidum*

If by parcel post add postage at zone rates, the weights being given against each subject. Single bulbs mailed free.

LILIUM CANDIDUM

The white Lily of English gardens, also known as the Madonna Lily, the Bourbon Lily and many other local names.

No other flower possesses such a history as this white Lily, which in all ages has been deemed the emblem of purity and chastity. It is perfectly hardy, and thrives in almost any soil where the bulb is not likely to be disturbed too often.

We recommend our customers to plant this variety early. Bulbs are ready beginning of September.

ENORMOUS BULBS. 11 and over. Weight 7 lb. per doz. Each, .25; per doz., 2.25; per 100, 14.00.

LARGE BULBS. 10 to 11. Weight 5 lb. per doz. Each, .20; per doz., 1.75; per 100, 12.00.

CARTERS EASTER LILIES

The chaste snow-white flowers supply a long-felt want for purposes of decoration. The flowers are produced in clusters on a stem varying from 2 to 4 ft. in height, and are exquisitely perfumed. They may be forced into bloom by Christmas.

LONGIFLORUM FORMOSUM.

Fine Large Bulbs. 7 to 9. Weight 4 lb. per doz. Each, .20; per doz., 2.00; per 100, 12.00.

The time of planting Lilies ranges from Sept. to Dec.; the earlier they can be procured and planted the better.

The finest of all Lilies for pot culture, alike for beauty, infinite variety, fragrance, and easy culture, are *L. Auratum* and *L. Speciosum*. Lilies for forcing should be started any time from September to the end of January. Under ordinary conditions Lilies may be had in bloom from June to October.

The depth for planting different sorts of Lilies varies

greatly—some species will not thrive unless planted deep. On an average, we like to plant Lilies about 6 in. below the surface, which gives stem roots a chance to assist those under the bulb. They should not be laid in a scooped-out hole, but on a level loosened-up bottom, with some nice friable soil to root into, either singly or in clumps of three to six, each bulb 9 in. or so apart, according to sort.

CARTERS LILIUM AURATUM

The beautiful Golden-rayed Lily of Japan

This grand Lily has now been brought to such a popular price that it should be largely grown in every garden. In soils suitable to its taste it will thrive in increased vigor each season in borders, and should be extensively cultivated in such spots.

Our consignments usually arrive from the middle of November onwards, and we book orders for delivery as soon as the bulbs are received.

FINE GIGANTIC BULBS. 11 to 13. Weight 7 lb. per doz. Each, .45; per doz., 4.50; per 100, 30.00.

LARGE BULBS. 9 to 11. Weight 5 lb. per doz. Each, .35; per doz., 3.25; per 100, 25.00.

If by parcel post add postage at zone rates, the weights being given against each subject. Single bulbs mailed free.

CARTERS LILIUM SPECIOSUM

Next to the *Lilium Auratum* we must place the *Speciosum*, so exquisite in form and so easily cultivated. It thrives well out in the border, and, with its pure chaste white, orange, crimson-spotted, and rose-spotted flowers is very attractive.

SPECIOSUM ALBUM. Splendid pure white. Ht. 3 ft. 9 to 11. Weight 3 lb. per doz. Each, .35; per doz., 3.50; per 100, 25.00.

SPECIOSUM ROSEUM. White, spotted light rose. Ht. 3 ft. 9 to 11. Weight 3 lb. per doz. Each, .35; per doz., 3.25; per 100, 22.00.

SPECIOSUM RUBRUM. White ground, heavily spotted crimson. Ht. 3 ft. 9 to 11. Weight 4 lb. per doz. Each, .35; per doz., 3.25; per 100, 22.00.

LILY OF THE VALLEY

A crown is the description given to a single rootlet. They are generally sold in bundles of 25, and are most serviceable in a number of ways for decorative and forcing purposes. A clump is a large conglomerated mass of roots that will throw up a quantity of flowering spikes, either forced or when planted out of doors. Clumps are preferred for a permanent bed in the garden.

If by parcel post add postage at zone rates; weight of crowns 2 lbs. per bundle of 25.

CARTERS FINEST SELECTED CROWNS. For forcing. Per bundle of 25, 1.00; per 100, 3.50; per 1,000, 32.00.

GOOD FLOWERING CROWNS. Per bundle of 25, .85; per 100, 3.00; per 1,000, 27.00.

RETARDED LILY OF THE VALLEY

By availing ourselves of the modern method of cold storage we are enabled to supply forcing roots of this pretty decorative plant throughout the year.

GIANT FLOWERING RETARDED CROWNS for all Seasons. Per bundle of 25, 1.00; per 100, 3.50; per 1,000, 32.00.

LILY OF THE VALLEY CLUMPS. Large, field-grown. Each, .40; per doz., 4.00; per 100, 35.00.

PÆONIES

This family of plants on account of its stately beauty of bloom in such infinite variety of colors is indispensable for every garden. They are perfectly hardy, requiring no protection whatever, even in the most severe climate, and once planted increase in beauty each year.

Pæonies require a good rich, deep soil, and an abundant supply of water during the growing season. When enriching the ground, the use of too much fresh manure near the roots should be avoided. An important point to observe is not to plant too deep. The roots should be planted so that the eyes will be 2 to 3 inches below the surface. Too deep planting is a frequent cause of shy flowering.

DOUBLE HERBACEOUS PÆONIAS

OXALIS

These are extremely pretty decorative subjects for pot or hanging basket culture, both foliage and flowers being extremely attractive.

BERNUDA BUTTERCUP. This beautiful variety is now prime favorite: is of strong free growing habit, and, as its name implies, of a rich Buttercup yellow color. Per doz., .25; per 100, 1.50. Mailed free.

RANUNCULUS

This beautiful early summer border plant belongs to the buttercup family. The types now popular in the class under consideration would, from their gay appearance both in form and color, be hardly recognized as a relation to this modest denizen of the field. The cultural directions are practically the same as advised for Anemones.

CARTERS COCKADE. In a splendid variety of colors, immense double flowers. Is fitting in all respects to be cultivated by the side of the Anemone. The flowers are double, of immense size, and combine every possible shade of color peculiar to this interesting and easily-cultivated flower. Per doz., .50; per 100, 3.50; per 1,000, 30.00.

TULIPS

For our customers' guidance when making a selection of Tulips, we have numbered each variety in their order of flowering (No. 1 blooming first), so that by a careful selection a nice succession of blooms may be obtained, or, on the other hand, a grand display may be ensured by choosing only those varieties with the same number. For beautiful color effects we refer our readers to page 23 for our Royal Parks Selection of Single varieties, and for the Royal Parks Double varieties. These are selected for simultaneous flowering in each section, the Doubles being a week or so later than the Singles. All varieties marked with * are recommended for forcing.
